

Consumers demand increasingly meaningful, rich, and consistent digital experiences. Organizations must transform their digital customer touchpoints to deliver those experiences

What if you could subcontract a remote team of highly skilled, agile, lean application development experts with years of experience working together, reducing your cost, risk, and time to market ?

Our Application Development Capacity

Modern applications leverage a plethora of highly complex, rich, and diverse technology stacks that require highly skilled personnel to scope, design, and deliver highly differentiated products

Sample bio

Jorge Luis
Architect
and .Net stack
senior
developer

Jorge is an outstanding **architect and .Net stack** developer with more than **25 years of experience**. He has worked with major stakeholders on multiple projects, capturing requirements with attention to detail and delivering as per defined deadlines, **delivering a quality product**.

- 1993 annual award of scientific merit "TrackWalker 2.0: Computerized System for Neurophysiological Studies".
- 2000 national award of the Bioengineering Society, "Medicid Panda portable digital polysomnograph".
- Frequent speaker in technical and scientific forums and conferences.

Case Study

Challenge:

Our customer required to develop an application to control and configure the specific hardware they sell.

Solution:

We worked together with their teams, from the architecture definition to the release of the first version of the application.

This application completed their offering to their clients and has been in operation for almost ten years. We still work on maintenance and modernization tasks with them.
