Case Study

Challenge:

- ✗ Our customer was doing billing and meals forecast manually.
- ✗ And had a lack of visibility in their customer's billing process, spend, frequency of orders, and preferences.

Solution:

✓ We automated order preparation, packaging, and route planning.

✓ We implemented and integrated the billing process into Salesforce.com.

✓ And we developed a customer community where clients can have a personalized experience, enabling them to create and modify orders, analyze transactions and available credit, and provide reviews and ratings.
